

Kate Keller

Vice President,
System
Strategies

Kate Keller manages the System Strategies Team at Interact for Health. She is responsible for incorporating the grantmaking strategy and brand vision into the organization's health policy and communications efforts. She is responsible for Interact for Health's Affordable Care Act program and works with community partners to identify and advocate for health policies that improve our region's health.

Previously, Kate was the Senior Program Officer for School-Aged Children's Healthcare. The strategy involved her working with grantees in developing school-based health centers, which provide primary care and behavioral health services to children in the school setting. Kate also worked with grantees to improve access to behavioral health services for school-aged children.

Kate holds a bachelor's degree in political science from Eastern Michigan University and a master's degree in public administration from the University of Cincinnati.
